FUN, Lunch and Learn**

CMSA-SCC QUARTERLY MEETING **THURSDAY, November 16, 2023**

Sponsored by **sanofi**

Location: The Grand Long Beach
4101 E. Willow Street
Long Beach, CA 90815
562-580-3739

Time: 10:00 a.m. to 2 p.m.

2 Contact Hours for nurses and CCM

Presenters and Topics:

Dr. Stephen P. Grifka, MD, FAACS, Board Certified Otolaryngologist, Head & Neck Surgeon
Dr. Marc Kayem, MD, FRCSC, Board Certified Otolaryngologist & Plastic Surgeon

TITLE: Hey Doc, Why am I Off-Balance?

It is estimated that more than 15% of all adults have balance problems in the US. That is close to 40,000,000 people. The problem is increasing. What are the two main mechanisms underlying these balance dysfunctions? How can we determine which one is the problem for the individual patient? Is there anything we can do about it besides medicine or surgery?

Learning Outcomes: At the end of this presentation, attendees will be able to:

1. Recall the medical definition of 'balance'.
2. Recognize the components that comprise balance.
3. Describe the main two types of imbalance.
4. Discuss how to objectively test for balance.
5. Identify some treatments for balance dysfunction.

Jill B. Conner, Ph.D. International Health; Field Science Director for Sanofi US
Medical Affairs—Rare Disease Division

(The presenter is an employee of Sanofi and declares no conflict of interest at the time the continuing education program begins)

TITLE: Hidden in Plain Sight: Recognizing Manageable Genetic Conditions

Ever wondered what may be missed that is causing your client's progressive deterioration? This session will shed some light on a group of rare genetic conditions that may play a part. Lysosomal Storage Disorders (LSDs) are rare, hereditary metabolic diseases impacting multiple body systems. Patients may go years with misdiagnosis and management. This presentation will provide an overview of lysosomal storage disorders (LSDs) including inheritance patterns, pathophysiology, disease spectrum, and signs and symptoms, with an emphasis on the neurological impact of these diseases. The diseases that will be covered include Fabry Disease, Gaucher Disease, Mucopolysaccharidosis Type I (MPS I), and GM2 Gangliosidosis.

Learning Outcomes: At the end of this presentation, attendees will be able to:

1. Define lysosomal storage disorders (LSDs) and their causes.
2. Identify the progressive nature of a few of the LSDs including neurological manifestations of these diseases.
3. Recognize the signs and symptoms, diagnostic tools, disease management, and prognosis of Fabry Disease, Gaucher Disease, Mucopolysaccharidoses I (MPS I), and GM2 Gangliosidoses.
